

WELCOME

WE TAKE THIS OPPORTUNITY TO INTRODUCE OURSELVES AS A RELIABLE SUPPLIER OF OUR SS BRAND SULPHUR BASED PRODUCTS AS PER DEMAND OF OUR VALUED CUSTOMERS.

SULPHUR PRODUCTS

SS BRAND

HIGHEST QUALITY ASSURANCE

INTRODUCTION

Sri Enterprises established by S.V Choudary is one of the leading manufacturers of Sulphur products in India. The raw material is imported from world reputed suppliers and procured from domestic refineries. Our group companies activities include manufacturing of Sulphur based products like Sulphur Powder, Sulphur DP, WP, WDG, SC and Lime Sulphur. In our expansion plans we are constructing a greenfield plant at Andhra Pradesh to include value added products for usage in industrial and agricultural applications.

APPLICATIONS

Our products are prominently used for various industries and applications like explosives, tyres and agriculture. Rubber makers Sulphur Powder is used to make rubber products with required physical and chemical properties. Our agricultural products function as an insecticide and provide the essential sulphur nutrient to the crops. They can be applied to treat powdery mildew, leaf spot, rust mites, red spider mite and various diseases in an effective manner. The products are used on fruits and vegetables like apples, oranges, mangoes, beans, broccoli, cabbage, tomatoes, potatoes, peanuts, tea leaves and many other crops. Sulphur as an essential nutrient gives higher crop yields with assurance of incremental benefits to the farmer.

MANUFACTURING

Our unit is well equipped to make various sulphur products as per requirement of our valuable customers. We have installed in place a nitrogen system to ensure smooth running of operations and timely delivery of the consignments. The dispatched product maintains the freshness of the raw material characteristics making it highly suitable for various industrial and agricultural applications. Our company is ISO 9001:2015 certified and has the process in place to meet the requirements and demand of our valued customers.

TECHNICAL DATA

CHARACTERISTICS (percent by mass)

Elemental Sulphur Purity > 99.5%

Sieve Analysis - 100% passing 350 mesh/ as per Bureau of Indian Standards

Moisture Content < 0.5%

Acidity (as H₂SO₄) < 0.05%

Melting Point °C 113- 119

Ash at 850°C < 0.2%

Commercially free of Arsenic, Selenium and Tellurium

PRODUCT COMPOSITION

Sulphur content and additives are composed as specified by Central Insecticide Board and Registration Committee and Bureau of Indian Standards.

SS BRAND

SS brand sulphur products are uniquely identified for having the highest quality in the market. Our raw material is procured from world renowned sources with impeccable track record giving our brand product consistent properties and characteristics. Our assurance is from the experience in the field of chemicals particularly manufacturing sulphur products and relationship with reputed suppliers over the past 30 years. We are now actively engaged in exporting to countries like Sri Lanka, South Africa and United Arab Emirates.

SULPHUR PRODUCTS

The procured raw material is shifted in our warehouse for manufacturing and quality evaluation. The product is further sieved and blended to obtain uniformity and consistent particle size as per customer requirement. Machinery and electrical equipment are maintained and checked appropriately for smooth running of factory operations. SS brand sulphur products are finally packed upon lab approval and dispatched for usage in agricultural applications with paramount importance to quality.

QUALITY ASSURANCE

We document and perform all activities as per ISO standards including sample collection and analysis. SS Brand Sulphur products are evaluated as per quality procedures to possess highest quality characteristics. All chemical properties are continuously monitored to ensure they are within approved specified range meeting over and above the customer expectations. We are in the field of manufacturing sulphur products over the last 15 years and now have gained expertise on the elemental characteristics and technical markers required to stand as a leader in the industry.
